Profile

Full Stack Developer skilled in MERN stack and Web3 technologies. Experienced in building responsive web apps and decentralized applications (dApps) using React, Node.js, MongoDB, and Ethereum.

SKILLS

Languages: Java, JavaScript, TypeScript, SQL, Solidity, Python, HTML, CSS

Frameworks/Libraries: ReactJS, Node.js, Express.js, NextJS, Tailwind CSS

Databases: MongoDB, MySQL, Redis, PostgreSQL

Web3 & Blockchain: Ethereum, Solidity, Hardhat, MetaMask, Ethers.js, Web3.js, IPFS

Tools & Platforms: Git, GitHub, VS Code, Eclipse IDE, Render, Vercel

Work Experience

Full Stack Development Intern

Techkrate (LURP Technologies Pvt. Ltd.) | Jan 2026 – Present

- Developed responsive and user-friendly web applications using HTML, CSS, JavaScript, and React.js / Next.js by converting Figma UI/UX designs into pixel-perfect, functional interfaces.
- Integrated frontend components with backend APIs for dynamic data rendering while ensuring cross-browser compatibility and mobile responsiveness.
- Debugged, tested, and optimized web applications for performance and scalability, collaborating with engineering and design teams in a product-driven development environment.

EDUCATION

Nanasaheb Mahadik College of Engineering

B.E. in Computer Science and Engineering

Relevant Coursework: OOP, Data Structures, Operating Systems

Nov 2022 – Jun 2026

CGPA: 7.25 / 10

PROJECT WORK

Maid Finder | Live: <https://maid-finder-delta.vercel.app/>

Tech: MERN, Solidity, Ethereum, Ethers.js, IPFS, Pinata, Hardhat

- Built a blockchain-based platform connecting verified women workers with employers for secure home-service hiring.
- Implemented Ethereum smart contract escrow system for secure ETH payments and automated fund release upon job confirmation.
- Integrated IPFS for decentralized profile storage and developed real-time job tracking using React frontend.

College Project Management System | Live: <https://college-project-showcase.vercel.app/>

Tech: MongoDB, Express.js, Next.js, Node.js, JWT, Socket.io

- Built a full-stack platform connecting **students, mentors, and recruiters**, with role-based dashboards for efficient project management.
- Implemented a project verification system where mentors review and approve projects, enabling a “Verified” status for quality assurance.
- Developed real-time features and REST APIs, including progress tracking, authentication (JWT), and mentor–student communication using Socket.io.

AWARDS AND CERTIFICATES

- **AIWOS Organization:** Ranked among top 250 participants nationally and received an INR 2000 bounty for MaidFinder
- **College Hackathon Participation:** Participated and received certificate for innovative project submission.
